

CALL FOR PAPERS
2nd International Workshop on Telemedicine and e-Health
evolution in the new era of social distancing

March, 2023 - Atlanta, USA – www.telmed.santannapisa.it

"Toward a more inclusive Healthcare system"

In conjunction with IEEE Int. Conference on Pervasive Computing and Communications (PerCom 2023)

The TELMED Workshop will investigate the design, realisation and assessment of innovative computing, networking, and communication technologies as enablers to improve and sustain the access to various services all supporting and promoting a more inclusive remote health care. These technologies coupled or embedded in medical protocols or devices can ensure a continuous, efficient, effective, and inclusive health monitoring and medical assistance, both supporting patients at their home, including those living in remote areas, and citizens accessing primary care, also fostering new medical capabilities in hospitals. The papers should address forefront research and development in Telemedicine and e-Health with a particular focus on, but is not limited to, the following topics:

- **Technologies and applications in support of medical services:** field trials, new solutions, systems, models, applications in support of medical services to ensure the access to medical or primary cares promoting the inclusiveness of all the citizens, in particular of weaker and disadvantaged categories (ageing people, pregnancies and infants, minorities, poor and marginalized people, people living in remote areas, non-digital literate people), and also to reduce hospitalization.
- **Technologies and applications enabling remote medical monitoring and tutoring:** Telemedicine and e-Health to support critical patients (ageing people, chronic patients, pregnancies and infants, oncologic patients). Teliagnosis solutions.
- **Advanced data elaboration techniques:** Artificial intelligence, Data fusion, and context elaboration in Telemedicine and e-Health.
- **Communications and networking technologies:** Communications and networking systems and technologies for Telemedicine and e-Health to improve medical services, to promote a more inclusive health care, and to support remote medical monitoring.
- **Security and privacy issues** in Telemedicine and e-Health.

Each accepted paper requires a full PerCom registration and will be included and indexed in the IEEE digital libraries (Xplore) and in Scopus Database.

IMPORTANT DATES:

Submission Deadline: ~~Nov. 14, 2022~~ Paper registration: Nov. 28, 2022 Full paper upload: Dec. 7, 2022

Acceptance Notification: January 05, 2023

Camera Ready Submission: January 31, 2023

Organizers and Workshop Chairs

Piero Castoldi, Scuola Superiore Sant'Anna, Pisa, Italy

Anna Lina Ruscelli, Scuola Superiore Sant'Anna, Pisa, Italy

Lorenzo Mucchi, University of Florence, Florence, Italy

Matti Hämäläinen, University of Oulu, Finland

Technical Program Committee

Gabriele Cecchetti, Scuola Superiore Sant'Anna, Pisa, Italy

Valerio Conti, A. Meyer Children's Hospital - University of Florence, Florence, Italy

Michele Emdin, Fondazione Toscana Gabriele Monasterio & Scuola Superiore Sant'Anna, Pisa, Italy

Lorenz Grünerbel, Fraunhofer EMFT, Germany

Darya Majidi, Dcare - Dedalus Group

Mirco Manciuilli, TIME Group, Lucca, Italy

Jarmo Reponen, University of Oulu, Finland

Sujit Kumar Sahu, Scuola Superiore Sant'Anna, Pisa, Italy

Mariella Sarestonieni, University of Oulu, Finland

Luca Valcarenghi, Scuola Superiore Sant'Anna, Pisa, Italy
