CALL FOR PAPERS

3rd International Workshop on Telemedicine and e-Health evolution in the new era of social distancing
March, 2024 - Biarritz, France – www.telmed.santannapisa.it

"Health and inclusivity in the digital society"

In conjunction with IEEE Int. Conference on Pervasive Computing and Communications (PerCom 2024)

The TELMED Workshop will investigate the design, realisation and assessment of innovative computing, networking, and communication technologies as enablers to improve and sustain the access to various services all supporting a more inclusive remote health care. These technologies coupled or embedded in medical protocols or devices can generate new products, systems, devices, and tools for ensuring a continuous, efficient, effective, and inclusive health monitoring and medical assistance, both supporting patients at their home and fostering new medical capabilities in hospitals. The papers should address forefront research and development in Telemedicine and e-Health with a particular focus on, but not limited to, the following topics:

- **Technologies and applications in support of medical services**: field trials, new solutions, systems, models, applications in support of medical services to ensure the access to medical or primary cares promoting the inclusiveness of all the citizens, in particular of weaker and disadvantaged categories (ageing people, pregnancies and infants, minorities, poor and marginalized people, people living in remote areas, non-digital literate people), and also to reduce hospitalization.
- **Technologies and applications enabling remote medical monitoring and tutoring**: Telemedicine and e-Health to support critical patients (ageing people, chronic patients, pregnancies and infants, oncologic patients). Telediagnosis solutions.
- **Advanced data elaboration techniques**: Artificial intelligence, Data fusion, electronic patient record systems, and context elaboration in Telemedicine and e-Health.
- **Communications and networking technologies**: Communications and networking systems and technologies for Telemedicine and e-Health to improve medical services, to promote a more inclusive health care, and to support remote medical monitoring.
- **Security and privacy issues** in Telemedicine and e-Health.

Each accepted paper requires a full PerCom registration and will be included and indexed in the IEEE digital libraries (Xplore) and in Scopus Database.

**IMPORTANT DATES:**
- Submission Deadline: November 17, 2023
- Acceptance Notification: January 8th, 2024
- Camera Ready Submission: February 2nd, 2024

**Organizers and Workshop Chairs**
Piero Castoldi, Scuola Superiore Sant’Anna, Pisa, Italy
Anna Lina Ruscelli, Scuola Superiore Sant’Anna, Pisa, Italy
Lorenzo Mucchi, University of Florence, Florence, Italy
Matti Hämäläinen, University of Oulu, Finland

**Technical Program Committee**
Gabriele Cecchetti, Scuola Superiore Sant’Anna, Pisa, Italy
Simona Celi, BioCardioLab, Fondazione Gabriele Monasterio, Italy
Valerio Conti, A. Meyer Children’s Hospital - University of Florence, Florence, Italy
Michele Emdin, Fondazione Toscana Gabriele Monasterio & Scuola Superiore Sant’Anna, Pisa, Italy
Lorenz Grünerbel, Fraunhofer EMFT, Germany
Sreenivasan Ramasamyramamurthy, Bowie State University, USA
Jarmo Reponen, University of Oulu, Finland
Sujit Kumar Sahu, Scuola Superiore Sant’Anna, Pisa, Italy
Mariella Särestöniemi, University of Oulu, Finland
Franco Tecchia, VRMedia, Italy
Luca Valcarenghi, Scuola Superiore Sant’Anna, Pisa, Italy
